EDUCATION

Bachelor of Science, Computer Science, May 2008

Virginia College of Birmingham

Associates of Science, Network Engineering, May 2006

CERTIFICATIONS

Certified Information Security Manager (CISM)

GIAC Machine Learning Engineer (GMLE) – **expected 02/2025**

Business Leadership McKinsey Academy

Splunk Certified Admin

Qualys Vulnerability Management

PROJECTS

Project: Data Cleaning VMWare

Source: [https://github.com/katressa / Data -Cleaning](https://github.com/katressa/Data-Cleaning)

Platform & Technology: Python3, Splunk (SIEM), VMWare Machines, Log Analytics

Project: Web Scraping

Source: [https://github.com/katressa / Web-Scraping](https://github.com/katressa/Web-Scraping)

Platform & Technology: Python3, VSCode, Jupyter, 'http://quotes.toscrape.com/'

Project: Python Projects (my_Journey to learning how to code w/ python)

Source: [github.com/katressa / My Journey](https://github.com/katressa/My-Journey)

Platform & Technology: Python3, VSCode, Jupyter

EXPERIENCE

Company: Ki Investments, LLC | 12/2024

present

Title: Data Analyst (Freelance)

- Perform audits of energy companies Research & Development (R&D) prototype next generation projects verifying that activities performed during the project align within IRS guidelines.
- Characterize experimental products using newly developed procedures and present results to broader team
- Continuous education on new methods and developments affecting operations
- Collaborate with other engineers while performing forensic analysis to understand product attributes and performance
- Develop SOP's and train associates on developed test methods for internal usage.

Company: Southern Company Services

Title: Cyber Security Engineer | 5/2011

present

Senior Engineer instrumental in leading projects in Operational Technology (OT) environments structuring high-level technical design, implementation, and Operational support of cybersecurity platforms.

- Lead the implementation for secure configurations and deployment of multiple security stack tools that followed NIST 800-53 compliance requirements.
- Lead over 10+ specialist in the implementation of a Privilege Remote Access (PRA) project, that met 100% of deadlines and goals, with completion of saving more than \$1.1M in budgetary resources.
- Provided governance for policies that grant RBAC/LDAP access to the right members while harvesting a least privilege mindset
- Integrate new technologies to deploy a layered security format for accessing digital assets within the infrastructure.
- Content development (dashboards/reports) to assist with quality assurance of user's accounts activity.
- Develop standard operation procedure (SOP) documentation and packages that trained junior members of the team in task to leverage the on-boarding/off-boarding of user accounts associated with access requirements

SPLUNK

- Hands on experience with NIST 800-61 Incident Response Plans (IRP) to brief upper management on security incidents Investigation and response that happened in controlled environments
- Spearheaded the integration of Cribl Log Stream with Splunk environment to optimize log data flow
- Researched new and evolving threats and vulnerabilities with potential impact to the business
- Mastered onboarding of multiple data-sources to ingest security events into single or distributed instance.
- Extensive knowledge of a tier installation of the SIEM infrastructure deployment while automating using BASH on:
 - Search-Head(s)
 - Indexer(s)
 - Universal/Heavy Forward(s)
 - Cluster Master & Cluster Management
 - Splunk ES Foundational Knowledge

SKILLS & TECHNOLOGIES

Python, BASH, PowerShell, Agile, Jupyter Lab, Visual Studio, Trellix ePO, Tenable, Qualys, Terraform, Splunk SIEM, Remedy Ticketing System, Salesforce Ticketing System, AWS Infrastructure Management, Agile, Cisco Firewalls, Cisco Switches, Palo Alto (Panorama) Firewalls, Microsoft Office Suite, Help Desk
